flySAV®

Savannah/Hilton Head International (SAV) is a top-ranked U.S. airport serving Savannah, Hilton Head Island, and the Low Country of South Carolina and Georgia. SAV offers a 36-acre multi-tenant cargo facility with direct apron and runway access, cold storage infrastructure, and accommodations for wide-body aircraft. Strategically positioned near I-95 and I-16, as well as the Georgia Ports Authority, SAV offers seamless highway access, establishing it as a leading air cargo and logistics hub in the Southeast.

Air Cargo Facility

SAVANNAH® HILTON HEAD INTERNATIONAL

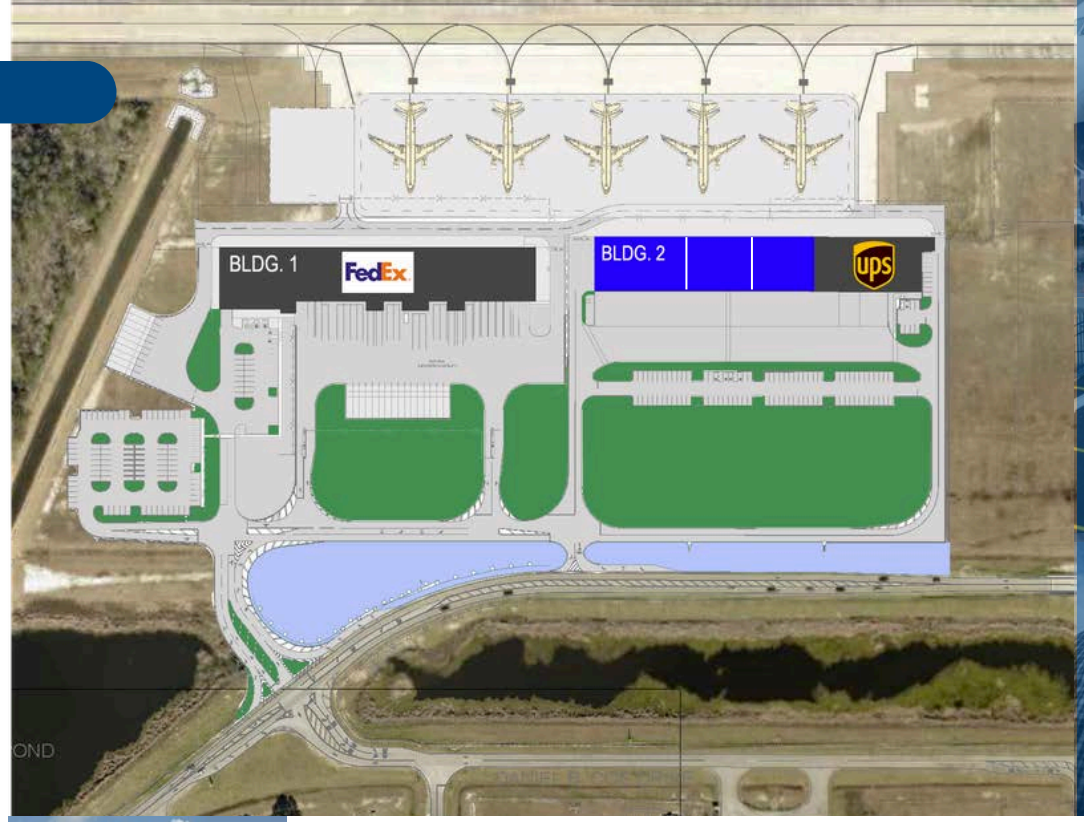

36-Acre Air Cargo Facility

Discover our multi-tenant cargo space built to enhance both airside and landside cargo efficiency at SAV. Located at the northern most point of the airport, the site offers strong connectivity with Taxiway H to the north, Taxiway G to the east, a drainage boundary to the west, and Gulfstream Road to the south.

This multi-tenant cargo space features four tenant spaces, three of which are available for lease. A single 25,000 square foot space along with two 10,000 square foot spaces, ideal for cargo handlers, logistics providers, and aviation-related operations looking for room to grow.

Each space offers seamless flow from landside truck docks, direct apron access, and convenient ramps and steps. Interior spaces are divided with secure metal stud and gypsum board walls to support operational privacy.

The site also features accommodations for multiple wide-body aircraft, designated vehicle parking and infrastructure to support cold-storage capabilities, making it a strong fit for temperature sensitive e-commerce, and time critical freight operations.

Southeastern U.S. Location

Located along Interstate 95 and less than 10 miles from Interstate 16, providing direct north and south connectivity and streamlined access to middle Georgia and Atlanta.

Georgia Ports Authority

Minutes from the Georgia Ports Authority, North America's largest single-terminal container facility in Savannah.
